

# HOW TO – TUBE

## how to correctly attach the rope to the racecar

### YOU NEED:

2 ropes

which are included with the racecar

There are two ropes included when you purchase the Racecar.

First attach each rope to the D-rings on the top and thread through the outer D-ring on the front side of the tube.

Repeat this process on both sides and connect them to form a triangle.

At this point you attach the main rope which is then connected to your boat.
