

HOW TO – TUBE

how to correctly attach the rope to the wing 5

YOU NEED:

2 ropes

which are included with the wing 5

There are two ropes included when you purchase the Wing 5 HD. First attach each rope to the D-rings on the top and thread through the outer D-ring on the front side of the tube. Repeat this process on both sides and connect them to form a triangle. At this point you attach the main rope which is then connected to your boat.
